1.0 is parity with the governorate's share of the 2024 census population; blue is over-represented, red under. Governorates are ordered by population, and n is that era's coded ministers. In a thin column a 0.0 means no CODED minister, not none — the post-2021 column rests on 30 people. Population is held at 2024 throughout, so read the columns against each other, not as levels.
