

Where the harvested date and the decree disagree

The 163 citations whose decree carries a published date; the other 132 are dated by year only and cannot be compared. 110 sit within a month of the date we record and 53 do not, with a median gap of 8 days. The gap is never negative: no decree in the matched set predates the start date we hold. A large value is a disagreement between sources to look at, not an error the pipeline has quietly corrected.
